

# **EXHIBITOR FIREARM POLICY**

To ensure the safety of all of the attendees, exhibitors, presenters, and visitors who attend our conferences we are enacting the following safety precautions.

- A. Firearms will not be left unattended at any time in the exhibitor hall.
- B. All firearms must be locked in your hotel room or in another secure place when the exhibitor hall is closed. While moving firearms they must be in a closed container.
- C. There will be no live ammunition at your booth.
- D. All weapons will be unloaded, and the firing pins will be removed or modified to ensure that the weapons cannot be fired.
  - a. If the firing pins are not removed, the firearm must be disabled in another manner to ensure that no rounds can be fired. (i.e. Safety Tab or zip tie)
- E. It is strongly recommended that no magazines are inserted into the display weapons unless needed to show the functionality of the firearm.
- F. Each firearm will have its actions opened while being displayed.
- G. It is highly recommended that you do not carry any live firearm, concealed or not, during the hours when the exhibitor hall is open. If you elect to carry a live, concealed firearm during exhibiting hours, that firearm must never be used as a display and is for personal protection or in case of an emergency.
